From where I sit ... by Joe Marsh

From Sheepskin to Sheep

There aren't too many college graduates in our town. Good honest thinking, yes...but most folks went from high school into farming.

No harm in that! But I admire veterans like Dick Newcomb ... who's 23, but going to college under the G.I. Bill of Rights. Intends to be a sheep farmer—but a better-informed, more scientific farmer, with more know-how!

And veterans like Dick aren't letting anything interfere. What little relaxation they allow themselves is in the form of needed exercise, or books, or conversation and an occasional glass of beer with friends.

Seems as if, just by having their education postponed, they've put a higher value on it ... and on things like temperance (that glass of beer, for instance), understanding, and good citizenship. And from where I sit, when Dick gets his sheepskin—he won't have lost much time. He'll be an even better farmer than his Dad. (Exactly what Dad wanted!)

How women and girls may get wanted relief from functional periodic pain

Cardui is a liquid medicine which many women say has brought relief from the cramp-like agony and nervous strain of functional periodic distress. Here's how it may help:

1 Taken like a tonic, Cardui helps "relieve appetite aid digestion," thus help build resistance for the "time" to come.

2 Started 3 days before your period is due, Cardui may help relieve pain due to purely functional periodic causes.

Try Cardui. If it helps, you'll be glad you did.

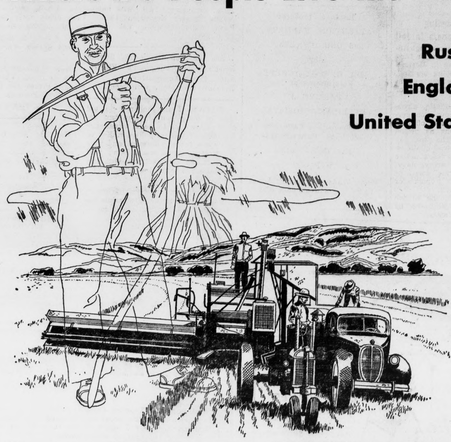
Where Do People Live the Best?

Russia?
England?
United States?



The answer: The U. S.

We are better fed, better clothed, and have more automobiles, refrigerators, telephones, and radios per capita than any other country.

Why? One reason is the efficiency of the American farmer. In countries where farm production is low, the standard of living is low.

The American farmer represents only 2½ per cent of the world's farmers, yet he produces approximately 20 per cent of the world's food supply.

Steel production also is an accurate measure of living standards. America, with only 7 per cent of the world's population, produces 50 per cent of the world's steel.
